

# RestoreCore Gets Sophisticated With IntermixIT

**F**ounded in 1995 by Andrew Goldberg and his father, Michael Goldberg, RestoreCore specializes in performing disaster recovery services. Our job is to help those who have experienced damage from fire, smoke, water, mold, and other disasters.

Our company primarily performs work for commercial and office buildings, multi-family residences, and healthcare facilities. Our work is critical because we are restoring people's lives and businesses during very stressful situations. Today, we have seven locations throughout Pennsylvania, New Jersey, and Maryland.

Before IntermixIT we primarily performed our IT in-house. However, the level of sophistication our IT required as we grew quickly became more than just having a single generalist on-site. We realized we needed a team of specialized technologists to manage everything from cybersecurity to network administration to maintaining servers to keeping the system up and running day to day.

We crossed paths with IntermixIT in 2015 and after careful consideration, we decided to start working with them. What stood out to us was their responsiveness. Being in the disaster restoration business, when we need something fixed, we need it fixed right away. The last thing we want to do is make a bad situation worse with a system failure.

If our system is down, it makes it difficult for us to be at our best and on top of our game. From that standpoint, it's imperative that our systems are up and running and working properly so that we can quickly and fully deliver our services.

Anybody who knows anything about IT knows that any system has issues and needs to be maintained.

IntermixIT does an excellent job of making sure that our systems are always up and running, and when something does happen, they are highly responsive to get our systems back on track right away so we can get back to working at our best.

We can now provide guaranteed support to our clients through their hardest times because we've got the support behind us to do that, thanks to IntermixIT.

One thing that helps us sleep better at night now is the cybersecurity measures IntermixIT has put in place for us. As an organization, we have a giant target on our back, so IntermixIT helping us to stay vigilant has been invaluable to us.

We now have excellent controls in place, including consistent testing procedures and multi-factor authentication. IntermixIT also helped us transition from internal servers to cloud architecture. They managed the whole transition and created a much more stable environment for us to work in.

To other businesses who think they may be outgrowing their current IT solution: look for a company like IntermixIT that provides a total solution for all of your IT needs and choose a team who can efficiently and effectively serve you and keep your business up and running 24/7. You get what you pay for, and with a company like IntermixIT, the value you get is worth it. ■

INTERMIXIT DOES AN EXCELLENT JOB OF MAKING SURE THAT OUR SYSTEMS ARE ALWAYS UP AND RUNNING, AND WHEN SOMETHING DOES HAPPEN, THEY ARE HIGHLY RESPONSIVE TO GET OUR SYSTEMS BACK ON TRACK RIGHT AWAY SO WE CAN GET BACK TO WORKING AT OUR BEST.
